

## What advice would you give to someone considering an opportunity with Bank of America?

“Attend Bank of America recruiting events and career fairs at your university/college.”

### What is your current assignment and primary responsibilities?

My current role is in MQ Support under Mainframe Design and Build. My responsibilities include the support of the installation, configuration, monitoring and maintenance of software on multiple distributed environments in both production & test for several applications at Bank of America. Training has been lined up for me to gain experience on administrating the software on the z/OS Mainframe platform as well.

### What is the most challenging part of your job?

With my current position in the MQ Support group, I have the opportunity to work with multiple Lines of Businesses (LOBs) or different areas at the bank. The understanding of how each of the LOB's applications interact and fit in the big picture can be a challenging task. That knowledge aids in the troubleshooting of those issues.

### What attracted you to Bank of America?

I attended a Bank of America campus recruiting session held at my school, The University of North Carolina, Charlotte. During that session, the bank's core values, culture, Six Sigma methodology, internship opportunities, ability to move around within the company, and the benefits of being accepted into a College Hire Program were all mentioned. From the topics in the session and those conversations, I decided to follow-up and take a closer look at Bank of America.

### What advice would you give to someone considering an opportunity at Bank of America?

I was in the same situation a few short years ago and my advice is to attend Bank of America recruiting events and career fairs at your university/college and talk to the associates about any of your questions or concerns. From personal experience, I can say that the bank has an excellent set of benefits and one of the best working environments to help you develop and excel.

### Describe your experience and the value of your experience in the Bank of America summer intern program.

I was lucky to have participated in an internship here between my junior and senior years in college. Internships as well as College Hire Programs are organized with training and events that promote knowledge sharing and networking. I am still in communication with many of the interns I met that summer.
