

Find out what a typical day-in-the-life is like for Aurelie.

What is a typical day in your life at Bank of America?

6:45 – 7:30 AM: Arrive at desk, quickly check emails and review the daily news on my sector and the general economy. If it is company results' day, quickly read and analyze results and update sales and traders with possible market impact.

7:30 – 9:00 AM: Read the results' release in more detail and update the company's model.

9:00 – 11:00 AM: Attend the results' meeting or dial-in to the analyst conference call. Call sales and traders to give feedback.

11:00 – Noon: Assist lead analyst with calls to clients.

Noon – 1:00 PM: Lunch (usually at desk), read the press, check and answer emails. Walk around the trading floor to get feedback on trading activity relating to our sector.

1:00 – 2:30 PM: Discuss the potential results' implications and assist the lead analyst with updating/changing company's financial forecasts, opinion (underperform/neutral/outperform) and price objective if applicable.

2:30 – 5:00 PM: Participate in writing the research note summarizing the changes and submit the updated company's numbers into the central database. Answer clients' requests.

5:00 – 7:30 PM: Work on other ongoing projects. Check next day's calendar (results, macro events, etc.).

What is your current assignment and primary responsibilities?

I am assisting the lead analyst in Equity Research covering retail stocks. My principal responsibilities consist of maintaining our company models and economic databases and keeping them up-to-date, participating in writing research notes, meeting with companies' executives and clients, and suggesting and discussing new research ideas with the rest of the team.
